SUMMARY

Data Science and AI/ML-focused candidate with one year of in-person Data Science Professional training at Ducat School of AI, Gurugram. Skilled in Python, SQL, MongoDB, Machine Learning and Artificial Intelligence, with hands-on experience in data preprocessing, exploratory data analysis and predictive modeling. Strong analytical and problem-solving skills backed by a B.Sc. in Mathematics.

EDUCATION

Bachelor of Science (B.Sc.) in Mathematics | CGPA: 8.06 2023 – 2026

Chhatrapati Shahu Ji Maharaj University (CSJMU), Kanpur, Uttar Pradesh

SKILLS

- **Programming & Databases:** Python, SQL, MongoDB
- **Machine Learning:** Supervised Learning, Regression, Decision Tree, Random Forest, Predictive Modeling, Model Evaluation (MAE), Hyperparameter Tuning, Overfitting/Underfitting, Scikit-learn
- **Deep Learning & AI:** Deep Learning Fundamentals, Artificial Intelligence Fundamentals
- **Data Analysis & Preprocessing:** Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Train-Test Split
- **Data Visualization:** Matplotlib, Seaborn, Power BI, MS Excel
- **Mathematics & Statistics:** Statistics, Probability
- **Soft Skills:** Problem Solving, Analytical Thinking, Communication, Team Collaboration

TRAINING

Data Science Professional Program (In-Person) | Ducat School of AI, Gurugram

- Completed a one-year intensive, instructor-led offline program in Data Science, Machine Learning and Artificial Intelligence.
- Gained hands-on experience in Python, SQL, MongoDB, Pandas, NumPy, Scikit-learn and Power BI through practical assignments and coursework.
- Applied the end-to-end data workflow: data cleaning, exploratory data analysis, visualization (Matplotlib, Seaborn), model building and evaluation.

PROJECTS

House Price Prediction | Python, Pandas, Scikit-learn, Machine Learning

- Built regression models to predict house prices on the Iowa housing dataset using Decision Tree and Random Forest algorithms.
- Explored and prepared data with Pandas and split it into training and validation sets using train_test_split.
- Evaluated models with Mean Absolute Error (MAE) and tuned tree size (max_leaf_nodes) to balance underfitting and overfitting.

Python Programming Exercises

- Solved hands-on problem sets in Python using functions, conditionals, loops, lists, strings, dictionaries and external libraries.

Courier Management System | Python

- Developed a console-based Python application to manage courier bookings and tracking as part of the Introduction to Programming (ITP) coursework.

CERTIFICATIONS

- Intro to Machine Learning — Kaggle Oct 2026
- Python — Kaggle Sep 2026
- Introduction to MS Excel — Simplilearn Jul 2026
- Data Science Professional — Ducat School of AI Oct 2025
- Introduction to Programming Using Python — Infosys Springboard Jun 2025
